DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17, drawn to an apparatus for spraying a gas.

Group II, claim(s) 18-26, drawn to a method of spraying a gas.

Group III, claim(s) 27-33, drawn to an apparatus for generating a plasma.

4. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I and III and Groups II and III do not have any shared claimed subject matter, and therefore lack the same or corresponding special technical features. All that is shared between Groups I and II, i.e. the structural features of the apparatus for spraying the gas, is known in the prior art, and therefore cannot constitute a same or corresponding special technical feature. Japanese Kokai 2003-92292, from Applicant's IDS, teaches an apparatus for spraying a gas onto an object to be processed; said object comprising a processor 20 (Figure 3; English Machine Translation, Paragraph 43) having a group of hole rows composed of hole rows each extending in one direction (vertically in Figure 3), and arranged each other in a side-by-side relation at equal pitches in a direction (horizontally in Figure 3) orthogonal to and intersecting with the extending direction of each of said hole rows, the processing gas being blown through each of the hole rows (EMT, Paragraph 48); and a moving mechanism (comprising guide rods 7-10; Figure 1; EMT, Paragraph 52) for relatively moving the processor in a direction intersecting with the side-by-side arranging direction.
5. A telephone call was made to Alan Kasper on 24 March 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

7. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
